FORMED IN 1868, THE NOTRE DAME ALUMNI ASSOCIATION (NDAA) FURTHERS THE UNIVERSITY’S MISSION OF FAITH, LEARNING, AND SERVICE BY FACILITATING MORE MEANINGFUL LIFELONG RELATIONSHIPS WITHIN THE GLOBAL NOTRE DAME FAMILY. MEMBERSHIP IN THE ALUMNI ASSOCIATION IS AUTOMATIC AND FREE FOR ALL GRADUATES OF NOTRE DAME, AND CURRENTLY TOTALS MORE THAN 130,000.

The Alumni Association has a three-prong structure consisting of the Alumni Association staff, the Alumni Board of Directors, and various Alumni Association communities. The NDAA staff handles the day-to-day operations of the Alumni Association and provides support to the Board and the communities.

The Board of Directors sets priorities for the Alumni Association and represents Notre Dame alumni in communicating with the University administration. The Board is comprised of 29 directors and a president. Board members are elected by Notre Dame alumni for three-year terms, and meet on campus three times a year. The president and president-elect also serve on the University’s Board of Trustees.

Notre Dame’s thriving communities of alumni and friends provide a wide range of opportunities for socializing, networking, community service, spirituality, and personal development, and contribute to the rich experience that is unique to Notre Dame. These communities include 225 local Notre Dame clubs in the U.S.; 52 international clubs; undergraduate, law, M.B.A., and graduate school classes from 1930 to 2015; a Diversity Council; Notre Dame Women Connect; Young Alumni (graduated within the last 10 years); Senior Alumni (over age 55); and a host of other groups bound by a common interest.

Notre Dame Perspectives

Campaign 2016: An Election Like No Other
10:00 am Washington Hall, Auditorium

The United States is in the middle of one of the most unusual and, perhaps, disruptive presidential elections in its history. Each twist and turn of the campaign has been documented through non-stop news coverage and constant social media updates, but do we feel better informed or more confused? Join our panel of faculty and alumni experts who will cut through the clutter by discussing the big issues. Together, we will examine the 2016 primary process, look forward to the general election, explore the media’s role in this campaign, and break down the short- and long-term implications of this race. Don’t miss out on what promises to be a lively and stimulating program featuring our panelists’ perspectives and participation by the audience.

MODERATOR: Christina Wolbrecht, Director, Rooney Center for the Study of American Democracy

PANELISTS: David Campbell, Packey J. Dee Professor of American Democracy and Chair of the Political Science Department; Luis Fraga, Arthur Foundation Endowed Professor of Transformative Latino Leadership; Professor of Political Science; Don McGahn ’91, Partner with Jones Day and General Counsel for the Trump campaign; Katie Beirne Fallston ’98, President of Oak Tree Strategies and former Director of Legislative Affairs for President Obama

Navigating Your Financial Future
10:00 am Washington Hall, Auditorium

Learn how financial markets and other factors may impact individuals in the future. Our panel of experts will discuss the economic outlook and how it may impact your financial future. Topics include global markets, U.S. economy, short- and long-term trends, inflationary risks, debt outlook, and opportunities to leverage the Notre Dame Endowment.

Sponsored by Love Thee Notre Dame, a gift planning initiative

HOSTED BY: John Affleck-Graves, Executive Vice President

MODERATOR: Jack Brennan, Chairman Emeritus, Vanguard; University of Notre Dame Trustee and Fellow

PANELISTS: Ann L. Combs ’78, Principal, the Vanguard Group, Inc.; James J. Dunne III ’78, Senior Managing Partner, Sandler O’Neill & Partners, L.P.; Scott C. Malpass ’84, ’86 M.B.A., Vice President and Chief Investment Officer, University of Notre Dame

Movie fans, fellow writers, and filmmakers who simply appreciate a good story will relish this opportunity to get the inside scoop on how these famous films are made. **Being Atticus Finch**
FRIDAY, JUNE 3, 2:30 – 3:30 PM, ECK HALL OF LAW, PATRICK F. MCCARTAN COURTROOM

Atticus Finch, one of the main characters in Harper Lee’s To Kill a Mockingbird, is a man of principles and his views and deeds throughout the novel, despite the town’s criticism and intolerance. Throughout the novel, he attempts to pass these values onto his children, Scout and Jem. In this lecture, we will explore the following excerpts from this remarkable character:

- “As a lawyer fighting social inequality and tolerance, Atticus teaches us, ‘You never really understand a person until you consider things from his point of view.’
- “As a parent providing moral guidance to his children, Atticus reminds us to ‘[s]hoot all the bluejays you want, if you can hit them, but remember it’s a sin to kill a mockingbird.’
- “As a man of his word, choosing to focus on the positive rather than the negative, Atticus ‘is the same in his house as he is on the public streets.’

**Challenges and Opportunities of the New Peacebuilding**
SATURDAY, JUNE 4, 1:30 – 2:30 PM, DEBARTOLO CLASSROOM HALL, ROOM 129

Many pundits and professional politicians suggest that our era of global violence, and especially terrorism, makes peace a fantasy. This presentation, led by peace building expert, George Lopez, will challenge that claim and illustrate the new pathways to building peace. Our expert will provide an overview of the Kroc Institute’s Strategic Peacebuilding Pathways model being used in classrooms and more widely beyond. Ironically, these most effective and hopeful paths to peace require more ‘average’ citizens to be involved than it needs politicians or politicians. This presentation will illustrate how this is happening—and might involve YOU!

**PRESENTER:** George A. Lopez, Ph.D., Hesburgh Professor of Peace Studies, Emeritus

Shakespeare and Social Justice  
FRIDAY, JUNE 3, 2:30 – 3:30 PM, DEBARTOLO CLASSROOM HALL, ROOM 136  
Be inspired by Notre Dame’s vision for engaging the larger community through the works of William Shakespeare. Our experts will share how Shakespeare at Notre Dame (S@ND) engages the University’s social justice mission through the performing arts. Professor Peter Holland and S@ND Executive Director Scott Jackson will explore why Shakespeare’s works appeal to such a broad audience—including those most marginalized in our contemporary society. What can Shakespeare’s enduring works help us to understand about the human condition? And how can they form part of our commitment to justice for the common good? Join the discussion of an especially timely topic in this year that commemorates the 400th anniversary of his death. Participants will understand why Dean John McGreevy says, “One of the programs I’m most proud of as dean is Shakespeare at Notre Dame. It is one of those rare programs that crosses the humanities and the arts, and crosses into South Bend, educating our students, our faculty, and our citizens.”

PRESENTERS: Peter D. Holland, Ph.D., Associate Dean for the Arts, Professor, McMeel Family Professor in Shakespeare Studies, Department of Film, Television, and Theatre, Concurrent Professor, English; Scott Jackson, Executive Director, Shakespeare at Notre Dame, Concurrent Assistant Professional Specialist, Department of Film, Television, and Theatre and Office of Pre-College Programs

The Formation of Our Milky Way  
SATURDAY, JUNE 4, 1:30 – 2:30 PM, JORDAN HALL OF SCIENCE, ROOM 101/DVT  
Immerse yourself in the vast expanses of our universe as you learn what Notre Dame astronomers have just discovered about the location of the oldest stars in our very own galaxy—the Milky Way. One of the world’s top astronomers, Timothy Beers, will guide you through our galaxy as you experience 360 degree stargazing in the high resolution and high fidelity 50-foot digital dome in the University’s Digital Visualization Theater (DVT). Professor Beers studies the Milky Way’s origins and how the planets, stars, elements and everything around us was created. The chronographic (age) map he and his team of galactic archeologists have recently created will enable future critical tests of hierarchical galaxy formation models and the physical properties of the first stars born in the Universe.
